

Estadistics for January/2010

February 25, 2010

Arina

In this brief document we show the usage of arina during the January. This month 5018 computing days where used and the the average use of the cluster was 53 %. Since the first of December 11596 computing days where used and the the average use of the cluster was 64 %. The figure shows the usage of Arina along the month. In the first table the usage of each user is shown. The third collumn indicates all the time each user has used for calculation during this month. The fourth collumn shows the average time that each job was waiting before the it started running, in days units. In the second table, the same data as in table 1 collected by group is shown.

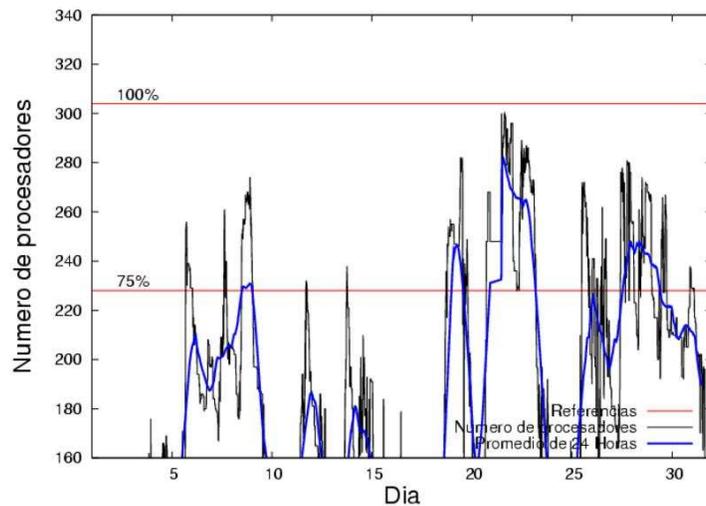

Figure 1: Cluster use. The blue line is a 24 hours average.

Table 1: Calculated time and waiting time in days of the users.

Pendolo

In this brief document we show the usage of arina during the January. This month 770 computing days were used and the the average use of the cluster was 35 %. Since the first of December 1547 computing days were used and the the average use of the cluster was 30 %. The figure shows the usage of Arina along the month. In the first table the usage of each user is shown. The third collumn indicates all the time each user has used for calculation during this month. The fourth collumn shows the average time that each job was waiting before the it started running, in days units. In the second table, the same data as in table 1 collected by group is shown.

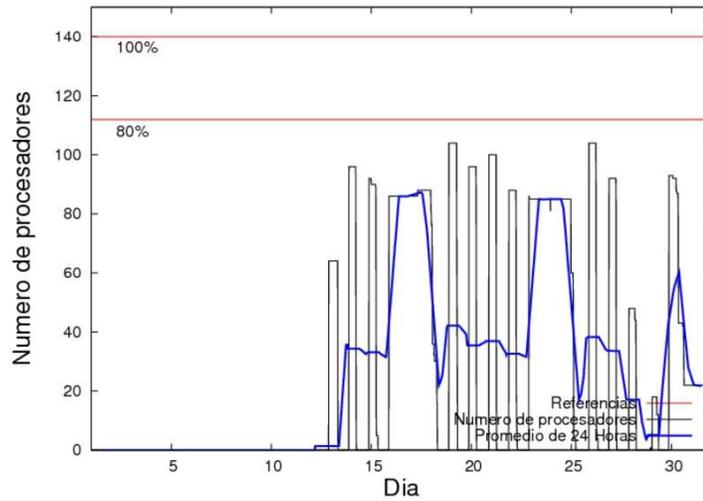

Figure 2: Cluster use. The blue line is a 24 hours average.

Table 3: Calculated time and waiting time in days of the users.

USER	GROUP	Calculated Days	Waiting Time
qovzaxxr	qofcm	674.79	1.90
