

# Estatistics for February/2011

March 1, 2011

## Arina

In this brief document we show the usage of arina during February. This month 20708 computing days where used and the the average use of the cluster was 98 %. Since the first of June 51052 computing days where used and the the average use of the cluster was 76 %. The figure shows the usage of Arina along the month. In the first table the usage of each user is shown. The third column indicates all the time each user has used for calculation during this month. The fourth column shows the average time that each job was waiting before the it started running, in days units. In the second table, the same data as in table 1 collected by group is shown.

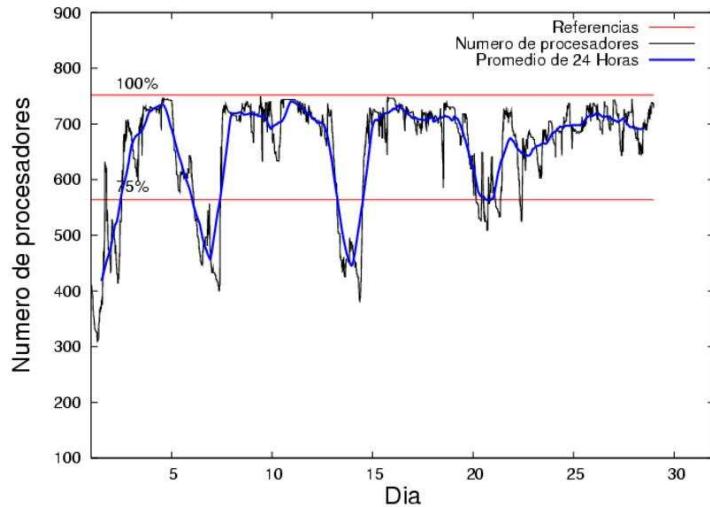

Figure 1: Cluster use. The blue line is a 24 hours average.

Table 1: Calculated time and waiting time in days of the users.

## Pendulo

This month 153 computing days where used in **Pendulo** and the the average use of the cluster was 8 %. Since the first of December 297 computing days where used and the the average use of the cluster was 4 %. The figure shows the usage of Pendulo along the month. In the first table the usage of each user is shown. The third column indicates all the time each user has used for calculation during this month. The fourth column shows the average time that each job was waiting before the it started running, in days units. In the second table, the same data as in table 1 collected by group is shown.

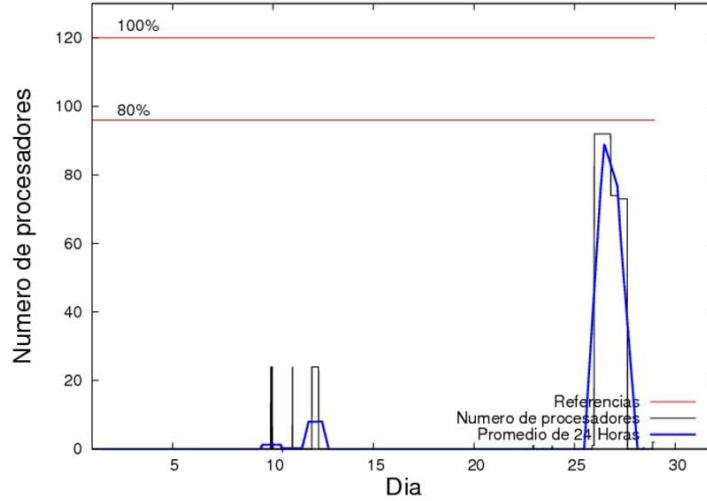

Figure 2: Cluster use. The blue line is a 24 hours average.

Table 3: Calculated time and waiting time in days of the users.

USER	GROUP	Calculated Days	Waiting Time
jtppragg	jtjob	138.51	0.19
webogare	arinadm	9.69	0.02
mtpmafel	mtgfa	4.94	14.40

Table 4: Calculated time and waiting time in days of the groups.

GROUP	Calculated Days	Waiting Time
jtjob	138.51	0.19
arinadm	9.69	0.02
mtgfa	4.94	14.40
