Estatistics for May/2011

June 1, 2011

Arina

In this brief document we show the usage of arina during May. This month 19205 computing days where used and the the average use of the cluster was 82 %. Since the first of December 105804 computing days where used and the the average use of the cluster was 77 %. The figure shows the usage of Arina along the month. In the first table the usage of each user is shown. The third column indicates all the time each user has used for calculation during this month. The fourth column shows the average time that each job was waiting before the it started running, in days units. In the second table, the same data as in table 1 collected by group is shown.

Figure 1: Cluster use. The blue line is a 24 hours average.

Table 1: Calculated time and waiting time in days of the users.

Pendulo

This month 861 computing days where used in **Pendulo** and the the average use of the cluster was 39 %. Since the first of December 2922 computing days where used and the the average use of the cluster was 19 %. The figure shows the usage of Pendulo along the month. In the first table the usage of each user is shown. The third column indicates all the time each user has used for calculation during this month. The fourth column shows the average time that each job was waiting before the it started running, in days units. In the second table, the same data as in table 1 collected by group is shown.

Figure 2: Cluster use. The blue line is a 24 hours average.

Table 3: Calculated time and waiting time in days of the users.

USER	GROUP	Calculated Days	Waiting Time
qovzaxxr	qofcm	556.52	2.59
jtppragg	jtjob	248.12	0.62
mtpmafel	mtgfa	56.26	2.84

Table 4: Calculated time and waiting time in days of the groups.

GROUP	Calculated Days	Waiting Time
qofcm	556.52	2.59
jtjob	248.12	0.62
mtgfa	56.26	2.84
