The methodology of the course has a communicative and interactive approach, focus on the students developing their learning skills. The course aims to work on the four linguistic skills (listening and reading comprehension, writing and oral expression) following an equilibrium between them and applying these knowledge to real communicative situations through:

Task-based learning: Learning is promoted through the performance of meaningful and contextualized tasks that reflect real-life situations.

Work in pairs and groups: Collaborative work and interaction among students is encouraged.

Use of practical materials: Practical materials such as texts, audios, videos and real communication situations are used to develop students' communicative competence.

Use of ICT (Information and Communication Technologies): Technological tools, such as Google Classroom, are used to enrich the teaching-learning process.

Formative evaluation and feedback: Continuous and formative evaluation is carried out to monitor student progress. Regular feedback is provided on their performance and opportunities for improvement are offered.

Activities outside the classroom: Formative activities are proposed to practice what has been learned in class outside the academic environment, such as interviews, language exchanges, cultural visits or participation in events related to the language and culture of the target language.

6. ACTIVITIES OUTSIDE THE CLASSROOM

Through the activities discussed below, students will put into practice what they have learned in class, in real scenarios of everyday life.

ACTIVITY 1

February 5th

An activity will be organized where students will conduct a language survey in the local community. Divided into groups, each group will ask questions related to the topics seen in class, such as greetings, daily expressions or culinary preferences. Students should interview local people and collect information about language use in the community.

ACTIVITY 2

March 11th

We will organize a meal at a local restaurant. Students will have the opportunity to practice the target language by interacting with the restaurant staff and placing their orders in the target language. Vocabulary guides and useful phrases will be provided prior to the activity. After the meal, a brief discussion about the dining experience can be held and opinions shared.

ACTIVITY 3

April 8th

Students will visit a local museum where they will explore exhibits related to the culture, history or art of the region. They will be encouraged to look closely at the exhibits and take notes on the most interesting aspects. After the visit, a conversation activity will be held to share impressions and reflections on what was learned during the museum visit.

ACTIVITY 4

April 22nd

Visit to a local market. Students will explore and learn about the products, be encouraged to interact with vendors and practice the target language by asking questions or negotiating prices. At the end of the visit, students will be able to share their impressions and experiences in a group conversation activity.
