

Estadistics for September/2010

October 13, 2010

Arina

In this brief document we show the usage of arina during September. This month 8596 computing days were used and the the average use of the cluster was 41 %. Since the first of June 24812 computing days were used and the the average use of the cluster was 29 %. The figure shows the usage of Arina along the month. In the first table the usage of each user is shown. The third column indicates all the time each user has used for calculation during this month. The fourth column shows the average time that each job was waiting before the it started running, in days units. In the second table, the same data as in table 1 collected by group is shown.

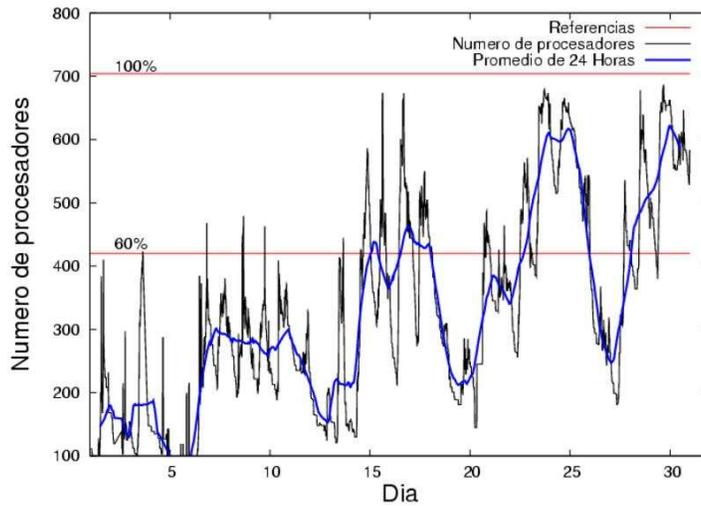

Figure 1: Cluster use. The blue line is a 24 hours average.

Pendolo

This month 0 computing days were used in **Pendolo** and the the average use of the cluster was 0 %. Since the first of December computing days were used and the the average use of the cluster was %. The figure shows the usage of Pendolo along the month. In the first table the usage of each user is shown. The third column indicates all the time each user has used for calculation during this month. The fourth column shows the average time that each job was waiting before the it started running, in days units. In the second table, the same data as in table 1 collected by group is shown.

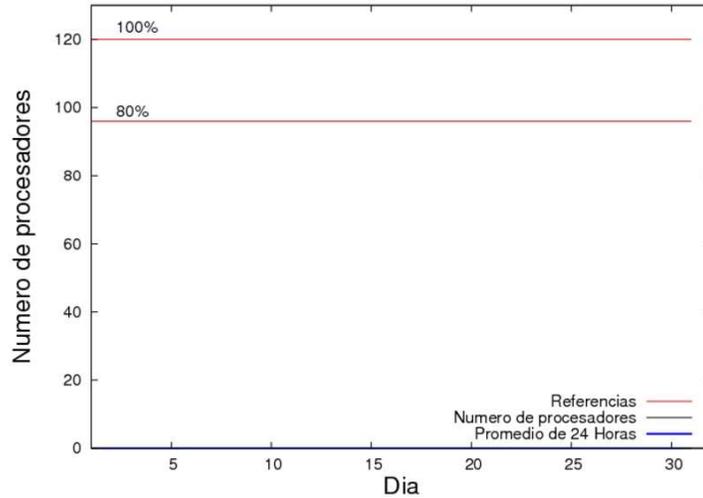

Figure 2: Cluster use. The blue line is a 24 hours average.
